

After getting acquainted with the rules of the Drausgiris Reserve and the species of organisms protected in it, orienteering maps were distributed, according to which the students, accompanied by the park staff, had to find the protected species. As it is not always possible to find the intended living objects in nature, simulations (drawings of organisms) have been prepared. Pupils had to capture them while taking pictures, as any activity is prohibited on the reserve.

The task of Annex 2 to record the organisms listed in the Red Book is being carried out

Appendix 3 Task Artists

Task in Annex 3 Ecologists Red-bellied toad
